T4

R₂D₂-F

Handheld Quantum Dot Immunofluorescence

High performance

High sensitivity based on advanced quantum dot immuofluorescence
Inner incubation ensures the results accuracy
High correlation with top chemiluminescence brands

User-friendly Base on advanced quantum dot immunofluorescence

Fast reaction up to 10 Min
High sensitivity, up to 20 ul sample
Wide detection range without dilution

Suitable for different Application scenario

Laboratory

ER

ICU

Clinics

GP Office

Ambulance

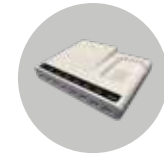

Comprehensive Menu

More than 40 parameters, meet the test requirements
Unique diabetes parameters AID diabetes monitoring

Scalable high efficiency *with Infinity-M1*

S-Channel timer, automatic recognition and timing
S-Chanel incubator, ensure reliable results

Robust functionality, small size

One of the smallest immunofluorescence analyzer
